

I would like to say a big thanks to Dr. Christopher Samujh who did a knee surgery on my right knee. I had been in so much pain before surgery that I could hardly walk or sleep. Thanks to Dr. Samujh I am now walking around the house without a walker or cane. I still have to use a cane after I go outside but it is getting better every day. I would tell anyone who has to have surgery to their knee to see him. I will never go to anyone else for problems concerning my knees. Thanks again to Dr. Samujh.
