

Knee Replacements from Dr. Schmaltz Conquer the Great Wall of China!

Dear Dr. Schmaltz,

Here is some advertising for you. In May, I went with members of the Marywood University Wind Ensemble on a performing trip to China. The replacement knees you installed worked great, and our conductor asked me if you put motors in them; he was very impressed!

The section of the Great Wall we were on is outside of Beijing and all steps were of varying height and evenness.

The day was very warm and early in our trip, so I chose to be conservative. Thank you for doing such a great job so I can participate in these adventures.

**Best wishes,
Joanne Still**

Knee replacements by Dr. Schmaltz go to China and walk the Great Wall near Beijing on a very warm day. Left knee 10 years; right knee 1 year. The red dot marks our turnaround spot.
