

Dr. Schmaltz recently performed a unilateral partial knee replacement on my left knee. I cannot begin to describe how thrilled I am with the outcome. Everything from pre-op through rehab went exactly as Dr. Schmaltz described. The pain I experienced was minimal. Hours after the surgery, I got up and walked with no limp for the first time in months. I returned to work seven weeks after the surgery to a very physically demanding job and have not had any problem since.
