

January 26, 2015

Dear Dr. Schmaltz,

I would like to thank you for your dedication to your profession. When I was diagnosed as having no cartilage in either hip, I was beside myself. You had informed me that it's not in your best interest to do both hips at the same time but in my circumstances, you had left that up to me. I had requested since I wanted to do both hips at the same time, if you could please do the Anterior Approach for my replacements. You had agreed to do that and to this day, I could not be more pleased with the outcome, I am pain free and living my life again. The most important part of the recuperation period was to be mobile and walk and keep walking. I am back on my treadmill once again and enjoying it every day now! You are very dedicated to your profession and this area is very fortunate to have you!!! You are a leader in your profession and I want to thank you from the bottom of my heart for giving me my life back again!!!! Thank You Dr. Schmaltz!!!

Sincerely,

Rosemarie A. James
