

Dear Stephanie,

I am responding to your request for a testimonial of my experience with Dr. Michael Tracy.

Before I had an appointment with Dr. Tracy I was unable to raise my left arm. Once lifted by my right arm I was able to move it and lower it, but I could not raise it without help.

My family doctor had me go for x-rays which were sent to Dr. Tracey. At our meeting Dr. Tracy recognized my situation as a classic rotator cuff condition. My wife, Dr. Tracy and I all agreed that the problem would not correct itself and surgery was the best option.

I had heard of horror stories about such surgery, but, faced with the problem and the pain I was experiencing with it, I wanted the problem fixed. I asked Dr. Tracy to do the surgery.

Dr. Tracy was easy to talk with and I was very much impressed by him. I am even more impressed with him now because after the surgery my situation seems to be other than the norm. I had no negative reaction to the surgery and I have full movement of my left arm now and I have no pain.

I am very happy to have met Dr. Tracy and I find it as a blessing to have my arm "fixed". I have expressed my appreciation to Dr. Tracy for all he has done for me and I request that you convey my appreciation to him also. Thank you.

Sincerely,  
John P Neary
