

On March 5th, 2008

DR Tracy performed surgery on my right Shoulder to repair a tear in the rotator cuff. Before surgery, I only had about 30% use from that shoulder. I am thrilled to say 6 months later, and with lots of therapy which is very important to recovery. I am very pleased with the out come, I now have 90% use in that shoulder. I am now preparing for DR Tracy to do surgery on the left shoulder. I would like to close by saying, Thanks to DR Tracy and, his staff from the nurses on up. They were very polite, Caring, and knowledgable.

Thank you

DR Tracy and staff.

Respectfully Robert Unterkoefler
